SUMMARY

MBA candidate at American University (May 2027) with 7+ years of software engineering experience in data integration and operational analytics. Built decision-support systems for the U.S. Department of State and banking-data products serving Capital One, connecting technical delivery to staffing capacity and customer verification.

EXPERIENCE

U.S. Department of State

New Delhi, India

Computer Programmer

November 2022 - September 2025

- Supported a 30% increase in daily visa-request throughput by building a dashboard that exposed seasonal demand by visa type and guided consular staffing decisions.
- Replaced manual consular complaint tracking with Power Apps, Power Automate, and SharePoint workflows, consolidating service requests into a centralized intake and routing process.
- Deployed consular vetting software across U.S. diplomatic posts in India, configuring workflows and training staff so participating teams could use the platform in day-to-day operations.

AIS Info

Gurugram, India

Software Engineer (Java Backend Developer)

November 2021 - November 2022

- Delivered verified bankruptcy data to Capital One by building Java pipelines that classified fragmented U.S. court records, loaded databases, and integrated third-party person and bankruptcy verification.
- Developed a commercial database of U.S. deceased-person records to support bank customer verification, consolidating source data so clients could update accounts and screen loan applicants against death records.

MS Star Computers Pvt. Ltd.

New Delhi, India

Software Application Developer

July 2018 - November 2021

- Moved classes online for 3 schools serving grades 1-12 during COVID-19 by building a Flutter application that replaced scattered WhatsApp-distributed Zoom links with centralized class access for teachers and students.

EDUCATION

American University, Kogod School of Business

Washington, DC

Master of Business Administration

Expected May 2027

Coursework: Business Insight through Analytics, Predictive Analytics, Advanced Text Analytics

Maharishi Dayanand University

Rohtak, India

Bachelor of Technology, Computer Science and Engineering

August 2021

PROJECTS

U.S. Retail Sales Forecast

github.com/akbknight/us-retail-sales-forecast

- Converted Federal Reserve Economic Data (FRED) into retail-sales forecasts using Python and Holt-Winters models; evaluated predictions against a 12-month holdout to quantify error with MAPE, MAE, and RMSE.

SKILLS

Programming & data: Python, SQL, Java, R, pandas, NumPy, MySQL, ETL pipelines, REST APIs

Analytics: Power BI, Excel, Streamlit, statsmodels, time-series forecasting, forecast evaluation

Applications & cloud: Flutter, Power Apps, Power Automate, SharePoint, AWS S3
